A large outbreak of Hepatitis A is spreading across Philadelphia.

You can protect yourself by getting the Hepatitis A shot and washing your hands after going to the bathroom, before eating food, and before using drugs.
WHAT IS HEPATITIS A?
Hepatitis A is a serious infection that can put you in the hospital. It spreads through poop, even in small amounts that you can’t see. Signs of Hepatitis A are fever, stomach pain, vomiting, dark urine & jaundice (yellow skin & eyes).

HOW DOES HEPATITIS A SPREAD?
Germs in poop
Drug Use
Unsafe sex
Contaminated food

HOW CAN I PROTECT MYSELF?
Wash with soap & water after using the bathroom
Use condoms
Exchange your used needles for clean ones

Get the Hepatitis A shot at a hospital or clinic! Visit your doctor, a City Health Center, or a Federally Qualified Health Center (FQHC) and ask for your Hepatitis A vaccine.
