

HUDDLE SHEET

COVID-19 Virus

Symptoms and Transmission

Common Symptoms:

- FEVER
- TIREDNESS
- DRY COUGH

Other Related Symptoms:

- aches and pains
- nasal congestion
- runny nose
- sore throat
- diarrhea

- Symptoms are usually mild and begin gradually
- In severe cases, infection can cause breathing difficulties, pneumonia and acute respiratory syndrome
- Older adults or people with underlying medical conditions are at increased risk for serious illness

Transmission:

- Person to person through close contact (approximately 6 feet)
 - Droplets expelled through coughing or sneezing
 - Contact with an infectious patient or contaminated object followed by touching eyes, nose, or mouth
 - Small particle aerosols in the vicinity of an infected person created by aerosol generating procedures such as nebulizers, suctioning, handling respiratory equipment
