THE WAIT IS OVER!

READY FOR MY COVID-19 VACCINE!

CHILDREN 6 MONTHS AND OLDER CAN NOW RECEIVE A COVID-19 VACCINE!

WHY SHOULD MY CHILD GET VACCINATED?
People of all ages can get sick from the COVID-19 virus. Although older people seem to have worse symptoms, children still can get very sick, spread the virus, or have long-lasting symptoms.

WERE THE PEDIATRIC COVID-19 VACCINES TESTED?
Yes! The pediatric COVID-19 vaccines were tested in thousands of children of different ages, races, ethnicities, and those with certain medical conditions.

WHAT IF MY CHILD ALREADY HAD COVID-19?
They should still get the vaccine. Getting a COVID-19 vaccine gives your immune (defense) system extra training to fight the COVID-19 virus and decreases the spread of the virus.

WHERE CAN MY CHILD GET A COVID-19 VACCINE?
You can make a COVID-19 vaccine appointment for your child with a pediatrician, local health center, nearby pharmacy or a community health organization. **All vaccines are free, regardless of insurance or immigration status. Call 311, scan the QR code below, or visit www.vaccines.gov to schedule an appointment!**
