

For after-hours immediate reporting and consultation: (215) 686-4514 -- ask for Division of Disease Control on-call staff

REPORTABLE DISEASES AND CONDITIONS

Amebiasis	Gonococcal infections	Leprosy (Hansen's disease)	Shigellosis
Animal bites(wild/stray/domestic)	Guillain-Barré Syndrome	Leptospirosis	Smallpox*
Anthrax*	Haemophilus influenzae, invasive disease*	Listeriosis	Staphylococcus aureus, vancomycin insensitive
Arboviruses*	Hantavirus Pulmonary Syndrome*	Lyme disease	Streptococcal disease, invasive group A
Babesiosis	Hemorrhagic fever, all*	Malaria	Streptococcal disease, invasive group B (infants 0-89 days of age)
Botulism*	Hepatitis A	Measles (rubeola)*	Streptococcus pneumoniae, invasive disease
Brucellosis*	Hepatitis B, also including: pregnancy in a Hepatitis B infected woman	Melioidosis*	Syphilis
Campylobacteriosis	Hepatitis C, also including: pregnancy in a Hepatitis C infected woman	Meningitis (viral, fungal, bacterial)	Tetanus
Candida auris*	Hepatitis, other viral	Meningococcal infections*	Toxic Shock Syndrome
Carbapenem-resistant Enterobacteriaceae (CRE)	Histoplasmosis	Monkeypox*	Trichinosis
Chancroid	Human immunodeficiency virus (HIV/AIDS) ‡, also including:	Multisystem Inflammatory Syndrome in Children (MIS-C) *	Tuberculosis §
Chikungunya	<ul style="list-style-type: none"> • acute HIV infection*+ • birth of an infant to an HIV infected woman*^, • new HIV positive result in a pregnant woman*^, and • pregnancy in an HIV infected woman*^ 	Mumps	Tularemia*
Chlamydia trachomatis including lymphogranuloma venereum	Influenza (including novel influenza A*, pediatric deaths*, and institutional outbreaks*)	Neonatal Abstinence Syndrome (NAS)	Typhoid (Salmonella typhi and paratyphi)*
Cholera*	Lead poisoning †	Novel coronavirus (SARS, MERS-CoV)*	Varicella, including zoster
Creutzfeldt-Jakob Disease	Legionellosis	Pandrug-resistant organism*.	Vibriosis
Cryptosporidiosis		Pertussis (whooping cough)	West Nile Virus*
Cyclosporiasis		Plague*	Yellow Fever*
Dengue		Poliomyelitis*	Yersiniosis
Diphtheria*		Psittacosis (ornithosis)	Zika, including prenatal and postnatal birth defects associated with congenital Zika infection
Ehrlichiosis/Anaplasmosis		Rabies*	
Encephalitis*		Rickettsial diseases (including Rocky Mountain spotted fever, rickettsial pox, typhus fever)	
Escherichia coli O157:H7 and Shiga toxin-producing bacteria*		Rubella (German Measles) & Congenital Rubella*	
Food poisoning*		Salmonellosis	
Giardiasis			

*Mandatory reporting of **all** immunizations administered to **all individuals of all ages** in the City of Philadelphia to PhilaVax, the City-wide immunization information system, at vax.phila.gov.*

***Report suspected and confirmed cases within 24 hours.** All unusual disease clusters, disease outbreaks, and unusual disease occurrences should be reported immediately.

†Report to Lead Poisoning Prevention at (215) 685-2788

§Report to TB Control Program at (215) 685-6873

‡+^Report to AIDS Activities Coordinating Office at ‡(215) 685-4789, +(215) 685-4781, or ^ (215) 685-4766, based on result/event type

- Organism is pan-drug resistant if it exhibits non-susceptibility to all antibacterial or antifungal agents tested
