

For after-hours immediate reporting and consultation: (215) 686-4514 -- ask for Division of Disease Control on-call staff

REPORTABLE DISEASES AND CONDITIONS

Acute flaccid myelitis*	Gonococcal infections	Leptospirosis	Shigellosis
Amebiasis	Guillain-Barré Syndrome	Listeriosis	Smallpox*
Animal bites (wild/stray/domestic)	Haemophilus influenzae, invasive disease*	Lyme disease	Staphylococcus aureus, vancomycin insensitive
Anthrax*	Hantavirus Pulmonary Syndrome*	Malaria	Streptococcal disease, invasive group A
Arboviruses*	Hemorrhagic fever, all*	Measles (rubeola)*	Streptococcal disease, invasive group B (infants 0-89 days of age)
Babesiosis	Hepatitis A	Melioidosis*	Streptococcus pneumoniae, invasive disease
Botulism*	Hepatitis B, also including: pregnancy in a Hepatitis B infected woman	Meningitis (viral, fungal, bacterial)	Syphilis
Brucellosis*	Hepatitis C, also including: pregnancy in a Hepatitis C infected woman	Meningococcal infections*	Tetanus
Campylobacteriosis	Hepatitis, other viral	Mpox*	Toxic Shock Syndrome
Candida auris*	Histoplasmosis	Multisystem Inflammatory Syndrome (MIS)	Trichinosis
Carbapenem-resistant Enterobacteriaceae (CRE)	Human immunodeficiency virus (HIV/AIDS) ‡, also including:	Mumps	Tuberculosis §
Chancroid	<ul style="list-style-type: none"> • acute HIV infection*+ • birth of an infant to an HIV infected woman*^, • new HIV positive result in a pregnant woman*^, and • pregnancy in an HIV infected woman*^ 	Neonatal Abstinence Syndrome (NAS)	Tularemia*
Chikungunya	Influenza (including novel influenza A*, pediatric deaths*, and institutional outbreaks*)	Novel coronaviruses (SARS, MERS-CoV, COVID-19 including infections in pregnant persons)*	Typhoid (Salmonella typhi and paratyphi)*
Chlamydia trachomatis including lymphogranuloma venereum	Lead poisoning †	Pandrug-resistant organism*•	Varicella, including zoster
Cholera*	Legionellosis	Pertussis (whooping cough)	Vibriosis
Creutzfeldt-Jakob Disease	Leprosy (Hansen's disease)	Plague*	West Nile Virus*
Cryptosporidiosis		Poliomyelitis*	Yellow Fever*
Cyclosporiasis		Psittacosis (ornithosis)	Yersiniosis
Dengue		Rabies*	Zika, including prenatal and postnatal birth defects associated with congenital Zika infection
Diphtheria*		Rickettsial diseases (including Rocky Mountain spotted fever, rickettsial pox, typhus fever)	
Ehrlichiosis/Anaplasmosis		Rubella (German Measles) & Congenital Rubella*	
Encephalitis*		Salmonellosis	
Escherichia coli O157:H7 and Shiga toxin-producing bacteria*			
Food poisoning*			
Giardiasis			

*Mandatory reporting of **all** immunizations administered to **all individuals of all ages** in the City of Philadelphia to PhilaVax, the City-wide immunization information system, at vax.phila.gov.*

***Report suspected and confirmed cases within 24 hours.** All unusual disease clusters, disease outbreaks, and unusual disease occurrences should be reported immediately.

†Report to Lead Poisoning Prevention at (215) 685-2788

§Report to TB Control Program at (215) 685-6873

‡+^Report to AIDS Activities Coordinating Office at ‡(215) 685-4789, +(215) 685-4781, or ^ (215) 685-4766, based on result/event type

- Organism is pan-drug resistant if it exhibits non-susceptibility to all antibacterial or antifungal agents tested
