## WOUND CARE: INFECTION CONTROL PRACTICES

- **1)** Perform hand hygiene (HH) before accessing the cart drawers.
- 2) Place alcohol-based hand sanitizer (ABHS) and facility approved EPA registered surface disinfect wipes on top of car.
- **3)** Clean top of cart with surface disinfectant wipe.
- 4) Keep wound carts outside of resident rooms at all times.
- **5)** Gather all supplies needed for wound care.
- 6) Disinfect scissors before use.
- 7) Dispense topicals into small single-use cups. Do not take topical medication containers into the resident room.
- 8) Establish a clean surface in resident's room for placement of supplies. Use a disposable pad or paper towel or disinfect the surface beforehand.
- 9) Perform HH.
- 10) Don clean gloves and PPE per facility policy. Eye protection and a face mask should be added if splash or spray is likely.
- **11**) Position barrier under wound.
- **12)** Remove old dressing and discard it into trash immediately.
- **13) Remove dirty gloves and discard.**
- **14) Perform HH and don clean gloves.**
- **15**) Cleanse wound, complete treatment, and dressing.
- **16)** Dispose of trash and all unused disposable supplies taken into the room.
- **17**) Remove gloves and perform HH.
- **18**) Disinfect scissors thoroughly in a fully open position after use and let air dry prior to returning to the wound care cart.
- 19) Disinfect all other non-disposable items that are returned to the cart (if any).

## WOUND CARE CART: INFECTION CONTROL MEASURES

- Perform hand hygiene before accessing the cart drawers.
- Stock carts with alcohol-based hand sanitizer and disinfect wipes.
- Dedicate scissors to each cart and disinfect before and after use.
- Dispense topicals into small single-use cups. Do not take topical medication containers into the resident rooms.
- Store medications in separate compartments or patient specific plastic bags and do not share among residents. Medications prescribed for residents are never shared.
- Remove gloves and perform hand hygiene if cart must be accessed during care
- Discard unused disposable supplies taken into the resident room. Do not return these items to the cart.
- Disinfect all non-disposable items that are returned to the cart.
- Disinfect scissors thoroughly in a fully open position after use and let air dry prior to returning to the wound care cart.
- Dedicate one wound cart for each unit or wing of the facility.
- Keep wound carts outside of resident rooms at all times.
- Disinfect all outside surfaces of the cart daily.
- Empty and disinfect all compartments on the inside of the cart, on a regular basis e.g., monthly.
- Review contents of cart on a regular basis e.g., monthly, and discard expired or compromised items.
- Discard resident medications upon discharge.
