

Alcohol-based hand sanitizer

is preferred over soap and water in most clinical situations. It is more effective than soap at killing germs and more accessible and faster than handwashing.*

PUT
PRODUCT
ON AND
RUB HANDS
TOGETHER

COVER ALL
SURFACES
UNTIL
HANDS FEEL
DRY

THIS
SHOULD
TAKE
AROUND 20
SECONDS

*Wash hands with soap and water if visibly soiled, before eating, after using the restroom, when gloves are visibly soiled, and when caring for patients with C. difficile, norovirus, or other unknown diarrheal illnesses.
