

2023 Philadelphia West Nile Virus Activity Report August 3, 2023

On July 11th, the first mosquito pool infected with West Nile Virus (WNV) in Philadelphia for the 2023 season was collected in Northeast Philadelphia. Positive mosquito pools are anticipated to be identified across the city in the coming weeks. No human cases have been reported in the City. While the number of human cases of WNV and location of outbreaks has varied by season across the country, identification of mosquitoes infected with WNV remains the best predictor of increased risk for human infection in a given location.

From May through October, the Philadelphia Department of Public Health (PDPH), in collaboration with the PA Department of Environmental Protection, conducts mosquito management activities throughout Philadelphia, which entails surveillance and identification of mosquito pools, testing pools for WNV, and control activities (eliminating breeding sites, larviciding catch basins, ground spraying, etc.). Since May 2023, 67 locations in Philadelphia have been treated to control larval mosquito populations.

West Nile Virus Mosquito and Human Case Surveillance, Philadelphia PA, Morbidity Week 29 and Cumulative 2023 Season Update

2023 Distribution of Positive Mosquito Pools and Human Cases:

^a3 locations had 2-3 mosquito pools test positive

WNV Testing and Reporting Requirements for Human Surveillance in Philadelphia:

- Collect serum (3-8 days after onset) and CSF for patients with unexplained encephalitis or meningitis. Absence of detectable antibodies in serum within 8 days does not exclude possible WNV and samples can be recollected after 8 days if concern continues.
- Report suspected and confirmed WNV infections (neuroinvasive or non-neuroinvasive illness) and encephalitis cases to PDPH by telephone at 215-685-6741 (or 215-686-4514 after hours). Reports also may be faxed to 215-238-6947.

	Week 29 (7/16-7/22)	2023 Season (5/1-7/22)
Mosquito Pools Tested ^a	88	343
WNV Positive Pools	19	20
Humans Tested ^b	0	2
Human WNV Cases	0	0
Neuroinvasive WNV	0	0
WNV Fever	0	0
Human WNV Deaths	0	0
Presumptive Viremic Donors	0	0

^a343 mosquito pools at 73 different mosquito trapping sites

^bTesting among case reports received by PDPH only

Advise your patients to:

- Use repellent with DEET (≥20% to also prevent tick bites), Picaridin, or oil of lemon eucalyptus when outdoors.
- Regularly check and remove standing water outside their home (e.g., unused pools, tires).
- Keep well-fitted screens on windows and doors.
- Report mosquito problems and dead bird sightings to the PDPH Vector Control Program's Mosquito Complaint hotline at 215-685-9000.
