

INJECTION SAFETY KAMISHIBAI AUDIT CARD

Date:		Circle Y, N, or N/A	
When possible, single use vials are used and multiuse vials are dedicated to one patient. NOTES:	Y N N/A	HH is performed on entry to the patient treatment area. NOTES:	Y N N/A
Injections are prepared using aseptic technique in a clean dry environment, away from patient areas and contaminants. NOTES:	Y N N/A	Gloves are donned if indicated. NOTES:	Y N N/A
Hand hygiene (HH) products are readily available and used prior to handling injection device and vial. NOTES:	Y N N/A	Injection site is disinfected with a sterile alcohol swab and administration is performed with aseptic technique. NOTES:	Y N N/A
Vial date, appearance, and type are assessed to ensure that medication is not expired or contaminated. NOTES:	Y N N/A	If multidose vials enter a patient treatment area, they are designated single use and discarded after use for that one patient. NOTES:	Y N N/A
The septum is disinfected with a sterile alcohol swab for several seconds and allowed to air dry prior to piercing or accessing the vial. NOTES:	Y N N/A	HCW properly activates auto cap or auto-disabling mechanism of the safety needle immediately after administration. NOTES:	Y N N/A
Single dose vials are disposed after dose is drawn up. Unused contents are never combined to use. NOTES:	Y N N/A	Non safety needles are immediately disposed without recapping into sharps container located in the patient care area. NOTES:	Y N N/A
Multiuse vials are dated when they are initially accessed with a beyond-use date of 28 days or per manufacturer's instructions. NOTES:	Y N N/A	All sharps are disposed of into a sharps container that is puncture proof and less than 3/4 full. NOTES:	Y N N/A
All vials are accessed with a new sterile needle and new syringe for every single patient dosage. NOTES:	Y N N/A	Hand hygiene is performed after disposing the medical device (needle, syringe) and doffing gloves when used. NOTES:	Y N N/A
Safe recapping is performed or a cap holder is used to prevent needle stick injuries before transporting the prepared injection. NOTES:	Y N N/A	BARRIERS & ACCOMPLISHMENTS:	

- 1) Discuss barriers to bundle compliance/improvement opportunities
- 2) Provide coaching and help to remove barriers (if able)
- 3) Thank HCW for everything they do to keep patients safe every day.
