## CRE Cases, by Carbapenemase-Producing (CP) Status: January 2023—December 2023

## *Candida auris* Report: January 2023—December 2023

### *Candida auris* Cases in Philadelphia by Month/Year

Colonization = 22  
Infection = 23

*Candida auris* continues to be an emerging threat in the southeastern PA and Philadelphia regions. The first *C. auris* case in PA was reported in March 2020 and since then, cases of both infection and colonization continue to rise. The majority of colonization cases appear in local healthcare facility clusters. For more information, see the joint [PDPH AND PADOH Health Alert](#) or the [C. auris webpage on the PDPH Health Information Portal](#).

Suspected or confirmed cases of *C. auris* should be reported to PDPH by calling 215-685-6748 within 24 hours. Complete the [Candida auris Report Form](#) and fax to 215-238-6947 **after reporting the case by phone.**
