

# PHILLY FLU FINDINGS

Philadelphia Department of Public Health  
Seasonal Influenza Surveillance Report

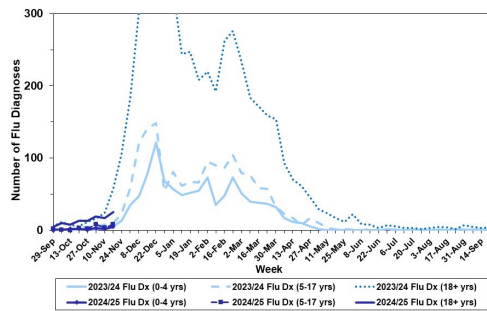

MMWR Week 47: November 17, 2024—November 23, 2024

## Philadelphia Influenza Activity

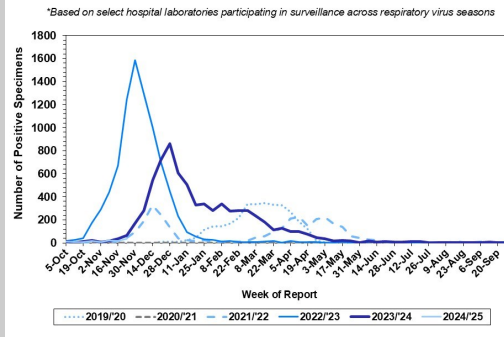

Please note these data are provisional and subject to change.

Influenza diagnoses at local emergency departments remained low for all ages during week 47. However, the trend for those 18+ years has been slowly increasing. Positive detections of influenza A and B at select local hospital laboratories both remain low. No influenza outbreaks have been reported or confirmed ( $\geq 1$  case of laboratory confirmed flu reported in a long-term care facility) so far this season.

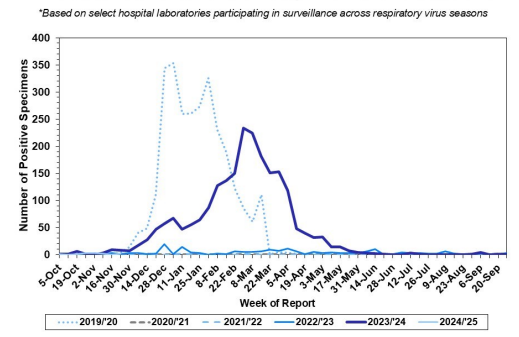

**Influenza Diagnoses at Philadelphia Emergency Departments, Current Season Compared with Previous Season**

**Laboratory-Based Surveillance for Influenza A Philadelphia, 2019/2020 through 2024/2025 Seasons\***

**Laboratory-Based Surveillance for Influenza B Philadelphia, 2019/2020 through 2024/2025 Seasons\***

## Pennsylvania

**As of November 23, 2024**, the Pennsylvania Department of Health (PADOH) reported that influenza A and B activity is low. PADOH has resumed weekly summaries for trends related to Influenza, RSV, and COVID-19. For more information, please visit: <https://www.pa.gov/en/agencies/health/diseases-conditions/infectious-disease/respiratory-viruses/respiratory-virus-dashboard.html>

## United States

**As of November 23, 2024**, the CDC reports that influenza activity is increasing slightly among children, but overall remains low nationally. In week 47, clinical laboratories reported 1,109 specimens (2.5%) of 44,867 specimens tested positive for influenza, 95.1% of which were influenza A. Of influenza A specimens subtyped at public health labs, 50.2% have been subtyped as H1N1 and 49.8% as H3N2. In week 47, Washington D.C reported very high levels of activity, while five other jurisdictions reported high to moderate levels of activity. All other jurisdictions reported low to minimal activity. Of note, two human infections of influenza A (H3N2) variant viruses were recently reported by the Minnesota Department of Health. For more information, please visit: <https://www.cdc.gov/fluview/surveillance/2024-week-47.html>

**All institutional outbreaks and hospitalized and fatal cases of influenza are to be reported to PDPH.**
