

2019 Philadelphia West Nile Virus Activity Report

October 16, 2019

Two human West Nile Virus (WNV) cases have been identified in Philadelphia during the 2019 season. Two adult residents developed neuroinvasive disease and were subsequently hospitalized. The WNV mosquito pool positivity for 2019 was higher than the historic median rate (12.3% vs. 4.2%), and lower than rates observed in 2010 and 2018 (24.3-39%), peak WNV activity seasons in Philadelphia. Increased risk for human infection will continue in Philadelphia until the first hard frost occurs.

From May through October, the Philadelphia Department of Public Health (PDPH) in collaboration with the PA Department of Environmental Protection conducts mosquito management activities throughout Philadelphia, which entails surveillance and identification of mosquito pools, testing pools for WNV, and control activities (eliminating breeding sites, larviciding catch basins, ground spraying, etc.). Since May 2019, 13 locations in Philadelphia were treated to control adult mosquito populations.

West Nile Virus Mosquito and Human Case Surveillance, Philadelphia PA, Cumulative 2019 Season Update

	Week 39 (9/22–9/28)	2019 Season (5/1–9/28)
Mosquito Pools Tested ^a	34	1045
WNV Positive Pools	4	129
Humans Tested ^b	0	14
Human WNV Cases	0	2

^a1045 mosquito pools at 151 different mosquito trapping sites

^bTesting among case reports received by PDPH only

State and National WNV Activity Reports

- [Pennsylvania Department of Health](#)
- [Centers for Disease Control and Prevention](#)

Advise your patients to:

- Use repellent with DEET ($\geq 20\%$ to also prevent tick bites), Picaridin, or oil of lemon eucalyptus when outdoors.
- Regularly check and remove standing water outside their home (e.g., unused pools, tires).
- Keep well-fitted screens on windows and doors.
- Report mosquito problems and dead bird sightings to the PDPH Vector Control Program's Mosquito Complaint hotline at 215-685-9000.

WNV Testing and Reporting Requirements for Human Surveillance in Philadelphia:

- Collect CSF (from symptom onset–day 8) and serum (day 8–14) from patients with unexplained encephalitis or meningitis for WNV IgM testing.
- Report suspected and confirmed WNV infections (neuroinvasive or non-neuroinvasive illness) and encephalitis cases to PDPH by telephone at 215-685-6742 (or 215-686-4514 after hours). Reports also may be faxed to 215-238-6947.
