

Philadelphia Influenza Activity

Please note these data are provisional and subject to change.

During week 34, influenza diagnoses at local emergency departments remained low. Detections for influenza A and influenza B at select local hospital laboratories remained low during week 34, consistent with the past several weeks. Data from all facilities are complete from Week 8 2025 forward. Twenty-nine influenza outbreaks in long-term care facilities have been reported and confirmed (≥ 1 case of laboratory confirmed flu reported in a long-term care facility) during the 2024-2025 season.

Influenza Diagnoses at Philadelphia Emergency Departments, Current Season Compared with Previous Season

Laboratory-Based Surveillance for Influenza A Philadelphia, 2019/2020 through 2024/2025 Seasons*

*Based on select hospital laboratories participating in surveillance across respiratory virus seasons

Laboratory-Based Surveillance for Influenza B Philadelphia, 2019/2020 through 2024/2025 Seasons*

*Based on select hospital laboratories participating in surveillance across respiratory virus seasons

Laboratory-Based Surveillance for Influenza (%) Philadelphia, 2024/2025 Season*

*Based on select hospital laboratories participating in surveillance across respiratory virus seasons

Pennsylvania

As of August 23, 2025 the Pennsylvania Department of Health (PADOH) respiratory virus summaries remain paused due to low activity. Activity levels in PA are based on laboratory confirmed influenza cases. For more information, please visit: <https://www.pa.gov/en/agencies/health/diseases-conditions/infectious-disease/respiratory-viruses/respiratory-virus-dashboard.html>

United States

As of August 23, 2025, the CDC reported that influenza activity remains low. In week 34, clinical laboratories reported 123 (0.4%) of 32,734 specimens tested positive for influenza, 82.1% of which were influenza A. Of influenza A specimens subtyped at public health labs, 91.7% have been subtyped as H1N1. In week 34, all jurisdictions with sufficient data reported minimal influenza activity. Activity levels were calculated from outpatient data reported to ILINet. For more information, please visit: <https://www.cdc.gov/fluview/surveillance/2025-week-34.html>

All institutional outbreaks and hospitalized and fatal cases of influenza are to be reported to PDPH.
