

Philadelphia Influenza Activity

Please note these data are provisional and subject to change.

During week 39, influenza diagnoses at local emergency departments remained low. Detections for influenza A and influenza B at select local hospital laboratories remained low during week 39, consistent with the past several weeks. Data from all facilities are complete from Week 8 2025 forward. Thirty-six influenza outbreaks in long-term care facilities have been reported and confirmed (≥ 1 case of laboratory confirmed flu reported in a long-term care facility) during the 2024-2025 season.

Influenza Diagnoses at Philadelphia Emergency Departments, Current Season Compared with Previous Season

Laboratory-Based Surveillance for Influenza A Philadelphia, 2019/2020 through 2024/25 Seasons*

*Based on select hospital laboratories participating in surveillance across respiratory virus seasons

Laboratory-Based Surveillance for Influenza B Philadelphia, 2019/2020 through 2024/25 Seasons*

*Based on select hospital laboratories participating in surveillance across respiratory virus seasons

Laboratory-Based Surveillance for Influenza (%) Philadelphia, 2024/25 Season*

*Based on select hospital laboratories participating in surveillance across respiratory virus seasons

Pennsylvania

As of September 27, 2025 the Pennsylvania Department of Health (PADOH) respiratory virus summaries remain paused due to low activity. Activity levels in PA are based on laboratory confirmed influenza cases. For more information, please visit: <https://www.pa.gov/en/agencies/health/diseases-conditions/infectious-disease/respiratory-viruses/respiratory-virus-dashboard.html>

United States

Influenza activity updates from the CDC are last available from week 38 and have been paused at this time. For the latest information, please visit: <https://www.cdc.gov/fluview/surveillance/2025-week-38.html>

All institutional outbreaks and hospitalized and fatal cases of influenza are to be reported to PDPH.
