

### Priority Infections

This is a list of infections that are most likely to be seen in higher than usual numbers this summer. It is important to keep broad differentials and obtain detailed travel histories on every patient.

- Measles
- Mpox
- Invasive meningococcal disease
- Seasonal influenza
- Influenza H5N1 or other novel influenza virus
- Middle East respiratory syndrome coronavirus (MERS), Severe Acute Respiratory Syndrome (SARS-CoV-1), or other novel coronavirus
- COVID-19
- Sexually transmitted infections
- Malaria
- Legionellosis
- Food and waterborne diseases (including food poisoning, norovirus, Salmonellosis, and shiga toxin-producing E. coli)
- Hepatitis A
- Vector-borne diseases (including West Nile virus, Lyme disease, Anaplasmosis, Babesiosis, Powassan virus, Dengue)
- Mumps
- Pertussis

### Diseases of Concern by Country

Country	Diseases of Concern	Sources
Curaçao	Chikungunya Dengue Hantavirus Leptospirosis <b>Measles</b> Tuberculosis Typhoid Zika	<a href="#">Curaçao - Traveler view   Travelers' Health   CDC</a>  <a href="#">Curaçao - Profile   Health in the Americas</a>  <a href="#">Travel advice and advisories for Curaçao</a>
