

### Carbapenem-resistant *Enterobacterales* (CRE): January—March 2026

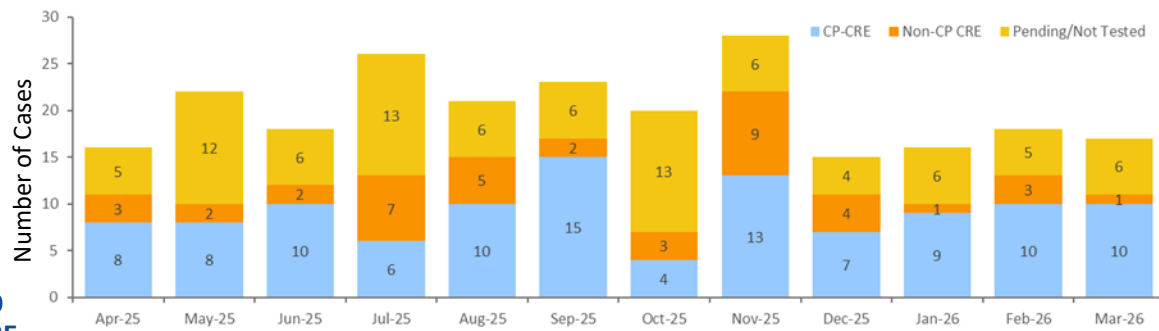

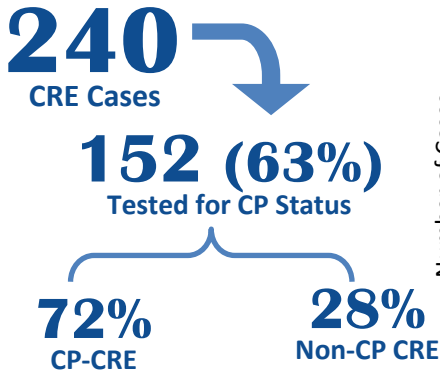

Carbapenemase-Producing (CP) Status of Confirmed Cases	
CP-CRE	29 (57%)
Non-CP CRE	5 (10%)
CP Status Pending/Not Tested	17 (33%)
<b>Total Confirmed CRE Cases</b>	<b>51</b>

CP testing capabilities of 15 clinical laboratories in Philadelphia	
Detection Method	n (%)
Carba NP, Modified Hodge, or other phenotypic testing only	2 (13)
PCR or other genotypic testing	4 (27)
No regular CP testing	9 (60)

CRE Counts, by Genus Species and Mechanism (n=51)							
Genus Species	Total CRE n (%)	Total CP-CRE	KPC	NDM	IMP	OXA48	VIM
<i>Klebsiella pneumoniae</i>	22 (43)	17	12	5	.	2	.
<i>Enterobacter cloacae</i>	12 (24)	5	4	2	.	.	.
<i>Escherichia coli</i>	8 (16)	4	3	1	.	.	.
<i>Serratia marcescens</i>	3 (6)	.	.	.	.	.	.
<i>Hafnia alvei</i>	2 (4)	.	.	.	.	.	.
<i>Other Citrobacter Spp.</i>	2 (4)	1	.	1	.	.	.
<i>Klebsiella aerogenes</i>	1 (2)	1	1	.	.	.	.
<i>Klebsiella oxytoca</i>	1 (2)	1	.	1	.	.	.
<b>Total</b>	<b>51</b>	<b>29<sup>1</sup></b>	<b>20</b>	<b>10</b>	<b>0</b>	<b>2</b>	<b>0</b>

<sup>1</sup>not all isolates sent for mechanism testing, some isolates have more than one mechanism

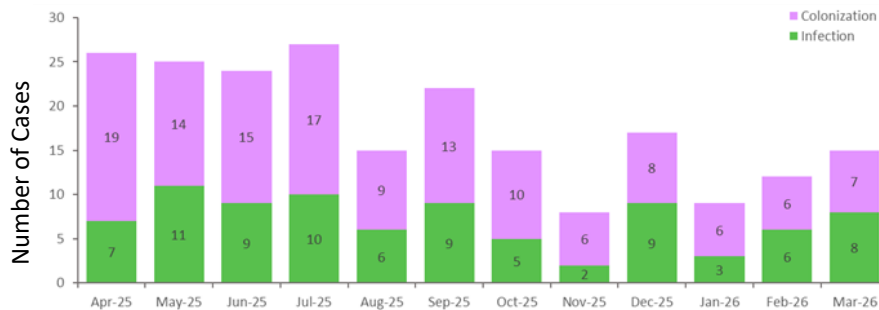

### CRE Cases, by Carbapenemase-Producing (CP) Status: April 2025—March 2026

### *Candida auris* Report: April 2025—March 2026

#### *Candida auris* Cases in Philadelphia by Month/Year

Colonization = 130  
Infection = 85

*Candida auris* continues to be an emerging threat in the southeastern PA and Philadelphia regions. The first *C. auris* case in PA was reported in March 2020 and since then, cases of both infection and colonization continue to rise. The majority of colonization cases appear in local healthcare facility clusters. For more information, see the joint [PDPH AND PADOH Health Alert](#) or the [C. auris webpage on the PDPH Health Information Portal](#).

Suspected or confirmed cases of *C. auris* should be reported to PDPH by calling 215-685-6748 within 24 hours. Complete the [Candida auris Report Form](#) and fax to 215-238-6947 **after reporting the case by phone.**
