

Carbapenem-resistant *Enterobacterales* and *Candida auris*

Surveillance Report

January—March 2024

Carbapenem-resistant *Enterobacterales* (CRE): January—March 2024

Carbapenemase-Producing (CP) Status of Confirmed Cases

CP-CRE	47 (59%)
Non-CP CRE	17 (22%)
CP Status Pending/Not Tested	15 (19%)
Total Confirmed CRE Cases	79

CRE Counts, by Genus Species and Mechanism (n=79)

Genus Species	Total CRE n (%)	Total CP-CRE	KPC	NDM	OXA-48
<i>Klebsiella pneumoniae</i>	34 (44)	24	20	1	3
<i>Enterobacter cloacae</i>	16 (21)	3	3	1	.
<i>Escherichia coli</i>	11 (14)	8	4	4	.
<i>Other Citrobacter Spp.</i>	5 (6)	4	4	.	.
<i>Serratia marcescens</i>	4 (5)	1	1	.	.
<i>Klebsiella oxytoca</i>	3 (4)	3	3	.	.
<i>Citrobacter freundii</i>	1 (1)	.	.	.	.
<i>Citrobacter koseri</i>	1 (1)	1	.	.	1
<i>Enterobacter aerogenes</i>	1 (1)	.	.	.	.
<i>Morganella morganii</i>	1 (1)	1	.	1	.
<i>Proteus mirabilis</i>	1 (1)	1	1	.	.
<i>Providencia Spp.</i>	1 (1)	1	.	1	.
Total	79	47¹	36	8	4

¹not all isolates sent for mechanism testing, some isolates have more than one mechanism

CRE Cases, by Carbapenemase-Producing (CP) Status: April 2023—March 2024

Candida auris Report: April 2023—March 2024

Candida auris Cases in Philadelphia by Month/Year

Colonization = 34
Infection = 35

Candida auris continues to be an emerging threat in the southeastern PA and Philadelphia regions. The first *C. auris* case in PA was reported in March 2020 and since then, cases of both infection and colonization continue to rise. The majority of colonization cases appear in local healthcare facility clusters. For more information, see the joint [PDPH AND PADOH Health Alert](#) or the [C. auris webpage on the PDPH Health Information Portal](#).

Suspected or confirmed cases of *C. auris* should be reported to PDPH by calling 215-685-6748 within 24 hours. Complete the [Candida auris Report Form](#) and fax to 215-238-6947 **after reporting the case by phone.**
