¹ Rates for 1990 to 1999 were calculated using 1990 Census data. Rates for 2000 forward were calculated using 2000 Census data. (The 2000 Census found a decrease of 72,169 Philadelphia residents.)

² As of the 2004 report, "Percent (%) Change" is consistently defined by the annual difference in case counts.

³ Chlamydia became a reportable condition in Philadelphia as of October 2nd, 1991. Rates are not calculated until 1992, and differences until 1993.

⁴ Prior to the 2004 report, the rates for year 2000 data were calculated using the 1990 Census denominator.
